

Riding Height Specifications

Check tire pressure. Specifications are found on door pillar or in glove box. Trunk must be empty (except for spare tire and jack). Front seats should be moved back. Fuel tank should be full. Normalize springs by bouncing vehicle up and down.

If equipped with Automatic Level Control, deflate system and disconnect air line from superlift port on control valve. Measure ride height at locations "A" and "B" as shown in Fig. 1.

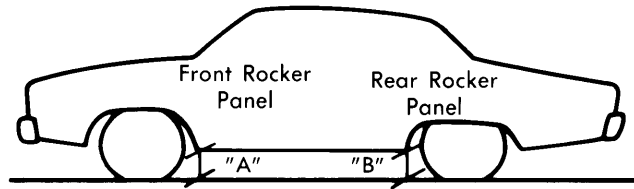

Fig. 1 Ride Height Measuring Points (All Models)
