Engine Identification

V8 ENGINES

390", 429" ENGINES

These engines used after 1962 can be distinguished from other engines by the distributor which is mounted at the front of the engine. *To determine displacement and horsepower, See General Specifications Table in appropriate engine article.*

472", 500" ENGINES

Distributor is at front of engine, on left side. Exhaust manifolds do not have headers. Exhaust manifold on left bank is equipped with heat shield. *To determine displacement and horsepower, See General Specifications Table in appropriate engine article.*
