HOT (SLOW) IDLE RPM

Preliminary Adjustments — All Models — Idle speed is checked or adjusted with engine at normal operating temperature, air cleaner installed, choke valve open, distributor vacuum line disconnected and plugged, "Fuel Tank" line to vapor canister disconnected (if equipped), air conditioning off and parking brake on.

NOTE — When adjustment of idle speed solenoid is required to obtain specified idle speed, **DO NOT** turn CEC solenoid.

307" Light Duty — Adjust idle speed solenoid to obtain specified idle RPM with manual transmission in Neutral and automatic transmission in "D". Disconnect idle speed solenoid lead and adjust idle speed solenoid screw (inside hex nut) with an Allen wrench to obtain an engine speed of 450 RPM.

350" & 454" Light Duty — Adjust idle speed solenoid to obtain specified idle RPM with manual transmission in Neutral and automatic transmission in "D".

307" & 350" Heavy Duty — Adjust carburetor idle speed screw to obtain specified idle RPM with manual transmission in Neutral and automatic transmission in "P".

454" Heavy Duty — Adjust idle speed solenoid to obtain specified idle RPM with manual transmission in Neutral and automatic transmission in "P".

ACCELERATOR LINKAGE ADJUSTMENT

Throttle linkage is cable type and is nonadjustable. Inspect all components for wear or damage and replace as necessary.

DETENT CABLE ADJUSTMENT

Turbo Hydra-Matic 350 Trans. — Remove air cleaner and pry up on each side of snap lock to release it. Compress locking tabs and disconnect lock assembly from bracket. Position carburetor in wide open position and pull rearward on cable housing until internal stop in transmission is felt. With cable and throttle in this position, push snap lock on cable until it is flush with top. Install air cleaner.

DETENT SWITCH ADJUSTMENT

Turbo Hydra-Matic 400 Trans. — Adjustment is required only if switch is removed or replaced. Install switch and press plunger as far forward as possible. This will preset switch for adjustment. Switch will now adjust itself when accelerator pedal is depressed to wide open position.
